Pronunciation of Tube Stations

English pronunciation is not simple because of: -Extra vowel sounds: London /LÄNDËN/, Borough /BÄRË/, and Southwark /SÄDHËrK/ share the same stressed vowel, the strut vowel /A/ and the same unstressed vowel; the schwa /E/ The schwa is the most common sound in English, but doesn't have a specific letter and doesn't exist in many other languages. -Complex Spelling rules: Blackwall /BLAKWOOL/. Star Lane /STAAr LEÎN/, and Mudchute /MÄDSHUÛT/ are not considered difficult to pronounce by native speakers. Why is this the case? It's because of complex yet consistent rules. For instance, the letter 'a' is generally pronounced as /A/, but it changes to /OO/ when followed by two 'l' ('all'); to /AA/ when followed by an 'r' ('ar'); to /EÎ/ when followed by a consonant plus 'e' ('a e'). Similarly, there are two common pronunciations for 'u': /A/ and /UÛ/ but the sequence 'u e' is invariably pronounced as /UÛ/. Speakers learn these rules through associations with common words spelled similarly, such as: call /KOOL/, car /KAAr/, case /KEÎS/, and June /JUÛN/.

-Multiple Exceptions: Sometimes, even native speakers are not sure of the pronunciation as there are words that don't resemble anything else, such as South Quay /SAÛTH KIY/. Other times, even more confusingly, they look like something else yet are pronounced differently, like Greenwich /GRENICH/ and Plaistow /PLAASTEW/.

-Disappearing consonants: Some consonants are always silent, like the 'c' in Leicester Square /LESTÉr SQWEEr/. Others are usually silent, although you may occasionally hear them, such as the 'l' in Holborn /HÉÜ'BĒrN/. These are indicated with an apostrophe, and learners are advised not to pronounce them. Some are usually pronounced but optionally dropped, especially in fast speech. For example, 't' and 'd' at the end of words when the following word starts with a consonant (e.g., Covent Garden /KOVĒNt GAArDĒN/). These are written in lowercase.

-The 'r' Special Case: Standard Southern British is a non-rhotic accent, and 'r' is only pronounced if followed by a vowel sound. For example, in Onor Oak Park /ONÊR ÊÛK PAArK/, the 'r' in 'Onor' is pronounced, while the 'r' in 'Park' is not. Nevertheless, these silent r sounds are pronounced in many accents, and pronouncing them might make learners more easily understood by others.

-Conclusion: There is no agreement on the standard pronunciation of Marylebone, with many considered correct. However, there is a consensus that /MEERILĒBĒŪN/, though it might seem like the most obvious choice, is certainly incorrect. The chosen pronunciation for the map is /MAArLĒBĒŪN/, with the weak /Û/ gilde of the unstressed /ĒÛ/ diphthong possibly barely perceptible.

L-IFA Phonemic Alphabet

The /LËKAAN'YË INGLISH FËNIÎMIK ALFËBET/ (L-IFA) is an alternative to the International Phonetic Alphabet (IPA), developed for all English learners. IPA symbols are unfamiliar and ambiguous making it difficult to memorise words. I remember repeatedly looking up [bə'lu:n], and ['lɪtrətʃə(r)] only to forget their pronunciation moments later. In response, L-IFA was developed as a bridge between spelling and pronunciation. It retains standard spelling whenever possible (but removes complex spelling rules and exceptions) and employs only a limited number of additional symbols. It is written in uppercase to reinforce pronunciation over written form; while lowercase is used for silent r and optional sounds. which may be pronounced or not. Optional sounds, which are usually not pronounced, are showed with an apostrophe. Once I wrote my frequently searched words as /BELUÛN/, and /LIT'RËCHËr/, I no longer needed to search for their pronunciation again.

Standard Southern British (SSB)

SSB, also known as modern Received Pronunciation, is the trendy accent of today's multicultural Britain.
